## Performance in scenarios

- 1) For scenario 1
  - a. How many times do you feel like you selected the incorrect color or missed one entirely? (colors were presented 50 times)
  - b. How many questions do you feel like you missed? (there were 30 questions)
  - c. If you used a cognitive aid/checklist, how much do you feel it changed your score on the questions?(give a number positive or negative)

## 2) for scenario 2

- a. How many times do you feel like you selected the incorrect color or missed one entirely? (colors were presented 50 times)
- b. How many questions do you feel like you missed? (there were 30 questions)
- c. If you used a cognitive aid/checklist, how much do you feel it changed your score on the questions?(give a number positive or negative)

## 3) for scenario 3

- a. How many times do you feel like you selected the incorrect color or missed one entirely? (colors were presented 50 times)
- b. How many questions do you feel like you missed? (there were 30 questions)
- c. If you used a cognitive aid/checklist, how much do you feel it changed your score on the questions?(give a number positive or negative)

1)	In your own words, please come pare using no checklists to using the paper checklists?
2)	In your own words, please come pare using the paper checklists to the computer-based checklist system
3)	If you have any ideas for system improvements, please list those here
4)	Any other thoughts?
